Heat Pump

NEED HELP WITH YOUR HEATING SYSTEMS-AT NO COST TO YOU?

AIR SOURCE HEAT PUMP

Heating and Cooling – Air Source Heat Pump

If you are heating your home with electric or oil heat, consider a heat pump. Heat pumps can efficiently heat in the winter and double as a cooling system in the summer -while lowering greenhouse gas emissions. This clean technology is environmentally friendly, affordable to operate, and can last longer than other heating and cooling systems. Heat pumps are not only more efficient, but they also reduce emissions of carbon into the atmosphere, making the world a cleaner and safer place to live.

Who Qualifies? If you live in Amesbury, Boxford, Georgetown, Groveland, Haverhill, Merrimac, Newbury, Newburyport, Rowley, Salisbury and West Newbury and you receive CAI Fuel Assistance services, you will qualify. Services are available to households at or below 60% of the Massachusetts median income. CAI follows federal guidelines based on your annual income and how many people are in your household.

OUR SERVICES
